

goREACT

Chemical Reactions On Your
iPad

USING goREACT

STEP ONE

goREACT starts you with a virtual periodic table.

STEP TWO

Drag elements to the reaction area at the bottom of the screen. Each element will pop up an info card at the top of the screen.

STEP THREE

Add more elements to try to make reactions. The app will give you suggestions if your combination doesn't do anything.

STEP FOUR

Active combinations take you to a new screen with an image or video and information about your reaction.

STEP FIVE

The app has built in sample reactions. Tap the menu on the bottom left to access them.

STEP SIX

Each sample menu item has a theme for its reactions.

STEP TWO

Each element will tell you its info

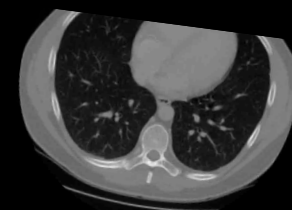

STEP ONE

Choose an element from the table

STEP FOUR

Active combinations will show an image or video

STEP SIX

Each set of samples has a theme

STEP FIVE

Try some sample reactions

goREACT is a great virtual chemistry lab. Experiment with elements with no fuss or mess. Great for science class!
