

Crackers & Goo

Using patterns to learn math

Crackers & Goo is a math app designed to teach math concepts through patterns. This game has multi levels for grades K-6. Students begin by completing basic patterns and adding crackers. As they move through the app, they begin to learn more complex skills such as multiplication, mental math, and more. The skills taught in the app are aligned to the Common Core Math Standards, and you can find information on the standards here: <http://crackersandgoo.com/common-core>

This is an app designed by teachers, for teachers.

Classroom Connection

Provide students that need a challenge with independent play time.

Provide students that require more visual and tactile interaction with a fun game to improve their math skills.

Use in small groups where students can play games and discuss the strategies they used to complete patterns and mental math. Students can help each other learn!

Display the game on the board and discuss pattern matching and mental math strategies in whole class instruction.
