Who Me?
Dr. Seuss Camera

Looking for a fun activity for Read Across America Day? The Who Me? app is a fun app for all ages. In this app, students snap a picture of themselves or someone else, and then turn it into a Who from Whoville. They can choose different styles of background, decorate their Who with clothing and accessories, and even pick their Who Name! Finished projects can be saved to the camera roll, or sent via email. What a great way to celebrate Dr. Seuss' birthday!

Classroom Connection

This app is a great way to get students interested in creative writing. Have students create their own Who using the app. Finished Whos can be printed out or imported into other apps to serve as a writing prompt. Have students describe their life as a Who, put themselves in a classic Seuss story, or write their own Seuss-style story!
