# Geography Drive USA App

United States Trivia

Geography Drive USA is a great way to brush up on your state trivia. Students select a garage, then begin traveling through states. At each state, they are given three trivia questions to answer. Correct answers earn them game cash they can spend to upgrade their cars. They can stop at gas stations to answer general US geography trivia to fill up. Students can stop at the Visitor Center to brush up on their state knowledge. Trivia questions include: The shapes, capitals, nicknames, postal abbreviations, flags, key symbols and more for all 50 U.S. states. National rivers, mountains, parks and time zones, important trails and railroads, and major U.S. cities and attractions. Important landmarks, movements and key moments in US history.

## Classroom Connection

What a great way to study states and US geography! Use as an enrichment activity or center. Host your own class geography bee with this app. Have students create tour guides for each state they visit.
